PROFESSIONAL EXPERIENCE

Raincode Bahrain [🔗](#)

Lead Software/DevOps Engineer

03/2024 – Present

- Leading 4 ongoing projects across web, mobile, and cloud.
- Managing the company's cloud environments on AWS and Azure, including provisioning, resource allocation, and day-to-day cloud operations.
- Building and maintaining CI/CD pipelines on GitHub Actions and AWS CodePipeline, integrating tests, security scans, and deployments.
- Provisioning infrastructure as code using AWS CDK and SST.
- Containerising and deploying services with Docker on AWS ECS, and operating observability through CloudWatch.
- Supporting employees on DevOps and cloud needs, ensuring smooth access, reliable tooling, and fast issue resolution.
- Started and lead Raincode's Security Scan service, a three-tier security assessment program aligned to ISO 27001 and NIST CSF, currently running its first client engagement.
- Started and lead Raincode's internship program, handling recruiting, mentoring, and project allocation.

System Administrator

01/2025 – Present

- Designed and deployed the company's full network infrastructure, delivering a secure and stable environment for both developers and clients.
- Managing and securing all company devices, including OS deployments, endpoint protection, and configuration hardening.
- Overseeing user access management, enforcing IT policies, and handling day-to-day IT administration.

Reboot Coding Institute [🔗](#)

DevOps Engineer

09/2025 – 11/2025

Led the planning and delivery of a simulated AWS workshop at AICS 2025 for more than 30 teams. Designed and deployed a hands-on, gamified Cyber Cloud challenge hosted entirely on AWS, guiding participants through securing and recovering a compromised cloud environment.

Software Engineer

09/2024 – 12/2024

- Lead the development of a gamified platform showcased at GITECH Dubai 2024, supporting user engagement and event interaction.
- Developed and integrated a benefit payment gateway.
